230 Zweringweg, 7545DA, Enschede

EDUCATION

Bachelor of Computer Science

Saxion University of Applied Science

2024 - 2028

SKILLS

- C / C++
- Python
- HTML / CSS
- C# / JavaScript
- Git
- Database / SQL
- Machine Learning
- Deep Learning
- Embedded systems (Rasberry Pi Pico, ESP32)

LANGUAGE

English

Vietnamese

PROFILE

I'm a Computer Science student at Saxion University of Applied Sciences with a strong interest in Artificial Intelligence and machine learning. I enjoy learning by building and working on hands-on projects involving data, algorithms, and software development.
I'm proactive, adaptable, and always looking for ways to improve my skills. Currently, I'm seeking internships or part-time opportunities in AI, data, or software development where I can gain practical experience and contribute to real-world projects.

WORK EXPERIENCE

Sale Assistant Jan - Aug 2024

Calvin Klein l 161 Vo Nguyen Giap St., Ho Chi Minh City

- Worked as a Sales Assistant at Calvin Klein, providing professional customer service in a fast-paced retail environment. Assisted customers, handled transactions, and ensured a positive shopping experience.
- Supported store operations through teamwork, visual merchandising, and stock management while developing strong communication and problem-solving skills.

Restaurant Server / Delivery Associates Aug 2025 - April 2026

Blue Sakura l Oude Markt 21, 7511 GB, Enschede

- Developed strong customer service and communication skills in a busy, fast-paced environment by helping customers, multitasking, and adapting quickly to different situations while solving problems.
- Improved teamwork and conflict-resolution skills through daily interactions with customers and colleagues, taking initiative during busy shifts, supporting teammates, and keeping a good level of service under pressure.

PROJECTS

NVIDIA (NVDA) Stock Price Prediction

- Built an end-to-end machine learning pipeline (2022–2026 data) to predict next-day NVIDIA (NVDA) stock returns using Alpaca market data, including feature engineering with technical indicators (momentum, trend, volatility) and a Random Forest model evaluated with MAE.
- Analysed and visualised model performance, highlighting challenges in financial time-series forecasting such as error accumulation and the trade-off between accuracy and stability.

Real-Time Hand Gesture Recognition (CNN + Temporal Convolutions)

- Built a real-time gesture recognition system using CNN and temporal Conv1D layers to classify hand gestures (thumbs up, thumbs down, stop) from video sequences. Created a data pipeline with OpenCV and trained the model using TensorFlow/Keras, with real-time webcam prediction.
- Achieved good validation results on a custom dataset and successfully ran real-time gesture classification on a standard laptop, combining both spatial and temporal feature learning for video input.
